

## 2008 NORTHEASTERN ONTARIO MINES & MINERALS SYMPOSIUM

*“A Century of Mineral Discovery”*

**April 14, 15 and 16, 2008**

McIntyre Arena, Timmins, ON

## **MMI Workshop**

### **Monday, April 14<sup>th</sup> - 9 a.m.**

On behalf of SGS Minerals Services I am pleased to invite you to an MMI workshop on **Monday April 14, 2008**. The seminar will be held at the McIntyre Area auditorium in Timmins. The seminar will start at 9am and will last roughly 3 hours.

We have seen a tremendous increase in the use of this geochemical technology, which provides high resolution and sensitivity in locating buried mineralization. We will highlight recent theoretical and practical advances in MMI technology as well as describing significant case histories recently generated, that cover a wide range of commodities, including gold, base metals and kimberlites. If you have not attended a seminar in the last 3 years, there is considerable new information particularly in regards to the multi element package MMI-M.

**The workshop is free of charge; we ask only that you respond as soon as possible to [bernadette.leboeuf@sgs.com](mailto:bernadette.leboeuf@sgs.com)**"
